

# CHAITANYA SHAH

## ORACLE APEX / PLSQL DEVELOPER

A competent software professional with comprehensive experience of over all 3+ Years across software design, development, testing, maintenance & support, Oracle PL/ SQL Developer, Form, Reports, Oracle Apex Developer, Oracle ODI Developer) with vast experience in Oracle PL/SQL, Application Developer, Jr. DBA Expertise in OraclePL/SQL Triggers, Procedures, Cursors, Function,View.

EMAIL ID : cchhaaiittuu28@yahoo.in CONTACT NO : +91-8866281828

### SKILLS

- SQL/PLSQL
- ORACLE APEX Tracking & analytics tools
- ORACLE FORMS AND REPORTS
- ORACLE ODI
- POWER QUERY TO PLSQL CONVERSION
- POWER BI(Basic)
- Tableau (Basic)

### EDUCATION

#### B.E IN COMPUTER SCIENCE

FACULTY OF ENGINEERING TECHNOLOGY AND  
RESARCH(TAJPORE,BARDOLI) | 2014 - 2018

#### PRIMARY, SECONDARY AND HIGHER SECONDARY SCHOOLING

S.F.A CONVENT HIGHSCOOL(NAVSARI,GUJAR AT)

### EXPERIENCE

#### SOFTWARE ENGINEER

Stridely Solutions(Ahmedhabad,Gujarat) 2021 - Present.

- Oracle Apex Developer
- Oracle PL/SQL Developer
- Oracle ODI Developer

#### JR.OFFICER I.T

Theis Steel Precision India (Navsari,Gujarat) 2020 - 2021

- Oracle Apex Developer.
- Oracle Forms and Reports With Oracle Database server 10g and 11g
- Basic Networking and Hardware Work

#### STOCK MANAGER OF GEMSTONES AND I.T PROFESSIONAL

Sukhadia Stones Co.,Ltd(Bangkok,Thailand) 2018 - 2020

- Work To Manage Stocks of Gemstones

### PROJECTS

#### HOT/HEIGHT WORK PERMIT.(THEIS STEEL )

- Developed in Oracle Apex. A Web Application Which can be used in Both P.C as well as Desktop.
- Used In almost All industries to carry out the Work Performed at height/risky Places.Form Filled for the safety Of job performer.
- Implemtationof Digital Signature and Web Cam To take digital Signature and Photo Of Job Performer.
- **Technologies** :(ORACLE PL/SQL,ORACLE APEX.)

## HAZARD NEAR MISS RECORDING.(THEIS STEEL )

- Developed In Oracle Apex .A Web Application Which can be used in Both P.C as well as Desktop.
- System Used In Industry To record the near-miss accident Which can be occurred due to Object Placed at Risky Placed Which Can Result into Accident in Future.
- **Technologies** :(ORACLE PL/SQL,ORACLE APEX.)

## PREVENTIVE MAINTENANCE SCHEDULER (THEIS STEEL )

- Developed In Oracle Apex .A Web Application Which can be used in Both P.C as well as Desktop.
- Application Used To Record The Maintenance of Mechanical Equipment.With auto carry Forward According to Frequency Days of Equipment which can result in No skipping of Preventive Maintenance of Equipment.
- **Technologies** :(ORACLE PL/SQL,ORACLE APEX.)

## DAILY LOGBOOK FOR MECHANICAL AND ELECTRICAL DEPARTMENT.(THEIS STEEL )

- Developed In Oracle Apex .A Web Application Which can be used in Both P.C as well as Desktop. Web
- App Used Mostly in Mechanical/Electrical Industry To Record The Work Of Maintenance Carried out on Daily Basis.Autocarry Forward Work according To shift Wise
- **Technologies** :(ORACLE PL/SQL,ORACLE APEX.)

## DAILY LOGBOOK FOR MECHANICAL AND ELECTRICAL DEPARTMENT.(THEIS STEEL )

- Worked on various ETL projects to extract data from different database and flatfiles and created package for the same based on logic.
- Created Store Procedure. Converted M-Query to PL/SQL to implement different logic requested by client.
- Due to this it makes it easy for the client to access data at one place at data mart.
- **Technologies** :(ORACLE PL/SQL,ORACLE APEX,ORACLE ODI

## COMMERCIAL CLAIMS DATA WAREHOUSE PROJECT.(STRIDELY SOLUTIONS)

- Role: ODI developer and PL/SQL developer. Environment: ODI 12c, Oracle Autonomous Data Warehouse. Description: Extract source data residing on the Claims SharePoint folder, Buildings ERP (Oracle 11i), and Components ERP (Oracle R12) databases, convert existing manual data pulls into scheduled pulls to the Oracle Autonomous Data Warehouse (ADW), transform the data, create a common data model(Commercial\_claims\_datamart), schedule an automatic transfer of data and freeze claims data every month on 5th business day, Data will be used in power BI dashboard.

### Roles and Responsibilities:

- Create and modify the mappings, packages, Procedures accordingly with the mapping document.
- Create stored procedure for scheduled data load as per logic built in excel m-query.
- Worked on all phases of project lifecycle from Development, UAT to Go-Live and Production support.
- Customized and enhanced prebuilds mappings.
- Prepared technical and delivery documents for Production migration.
- Worked on joins, filters, lookups, and other mapping components.
- Worked on complex freezing logics and scheduling.
- Resolved Production issues under strict timelines.
- Unit Testing, Release planning and coordination with different teams.

## PLANNER TOOL INTO DATA WAREHOUSE PROJECT.(STRIDELY SOLUTIONS)

- Role: ODI developer, PL/SQL developer and Oracle APEX Developer. Environment: ODI 12c, Oracle Autonomous Data Warehouse.
- Description: Extract data from 3 different reports Capacity, Scheduled and Produced for Buildings and Components and Monterrey Respectively ERP.
- Data Flow from Source to DW For Each Report:
- Capacity: Both Buildings and Components have Sharepoint as source data from Source data gets loaded into oracle staging table and then different transformation based on powerquery to pl/sql conversion is done and data gets loaded into oracle DW.

- Produced: Both Buildings and Components have CSV as Source and for Monterrey Sharepoint as source from Source data gets loaded into oracle staging table and then different transformation based on powerquery to pl/sql conversion is done and data gets loaded into oracle DW.
- Scheduled: Buildings have MSSQL as Source and Components have Oracle as source from Source data gets loaded into oracle staging table and then different transformation based on powerquery to pl/sql conversion is done and data gets loaded into oracle DW

#### **Roles and Responsibilities:**

- Create and modify the mappings, packages, Procedures accordingly with the mapping document.
- Create stored procedure for scheduled data load as per logic built in excel m-query.
- Worked on all phases of project lifecycle from Development, UAT.
- Customized and enhanced prebuilds mappings.
- Prepared technical and delivery documents.
- Worked on joins, filters, lookups, and other mapping components.
- Worked on converting Complex Powerquery to PL/SQL query provide by Client.
- Created APEX form and reports for different lookup tables for Insert, Update and delete so that user can modify records from form .
- Resolved Production issues under strict timelines.
- Unit Testing, Release planning and coordination with different teams.

#### **ANAPLAN SIDING DATA WAREHOUSE PROJECT.(STRIDELY SOLUTIONS)**

- Role: ODI developer, PL/SQL developer
- Environment: ODI 12c, Oracle Autonomous Data Warehouse.
- Description: Extract data from 2 different reports SO99 AND JDE.
- Data Flow from Source to DW For Each Report:
- SO99: There are 3 reports (Forecast accuracy, Monthly Forecast , Demand Data) all have MSSQL as source query and load data into stage(ORACLE) and then from stage based on column logic data goes in into DW(ORACLE) using merge query.
- JDE: There are 3 reports (ME INVOICE, FG PRODUCTION , DEMAND DATA)all have files as source and client share file in SFTP server from there we load file into staging(ORACLE and then from stage based on column logic data goes in into DW(ORACLE) using merge query.

#### **Roles and Responsibilities:**

- Create and modify the mappings, packages, Procedures accordingly with the mapping document.
- Create stored procedure for scheduled data load as per logic.
- Worked on all phases of project lifecycle from Development, UAT.
- Customized and enhanced prebuilds mappings.
- Prepared technical and delivery documents.
- Worked on joins, filters, lookups, and other mapping components.
- Worked on converting Complex Powerquery to PL/SQL query provide by Client.
- Unit Testing, Release planning and coordination with different teams.
